

Notification 22-14: Data Entry Requirements for Properties Consisting of Non-Contiguous Parcels

Effective: 11/01/22
Retired: 04/03/23

Summary of Changes

HIGHLIGHTS

Effective for Mortgage Loans Committed as of November 1, 2022, requirements for collecting and entering data for Properties consisting of Non-Contiguous Parcels were clarified.

Primary Changes

To better monitor the operating performance and property condition for a Property consisting of Non-Contiguous Parcels, you must:

- collect and enter consistent, detailed Property-level data for each Non-Contiguous Parcel; and
- use consistent references for each Non-Contiguous Parcel in all systems and documents (e.g., DUS Gateway, C&D, MSFMS, Underwriters Narrative, Form 4662, operating statements, rent rolls, inspection reports).

Underwriting

When underwriting a Property consisting of Non-Contiguous Parcels securing a single Mortgage Loan, you may consolidate the underwriting in a single Transaction Approval Memo provided you:

- collect detailed data for each Non-Contiguous Parcel, including separate
 - rent rolls, and
 - operating statements; and
- enter accurate Property records for each Non-Contiguous Parcel in DUS Gateway before requesting a quote.

To ensure you have the necessary data, you must:

- Use the Property name, if applicable, and address to reference each Non-Contiguous Parcel; however, for a Supplemental Mortgage Loan, enter the same address(es) as for the Portfolio Mortgage Loan.
- Ensure the Propertys Underwritten Pro Forma Income Statement:
 - separately itemizes each Non-Contiguous Parcels identification, preferably using the name and address for each parcel; and
 - has sufficient detail to comply with Part II, Chapter 1: Attributes and Characteristics, Section 102: Multiple Properties.
- Require every third-party report to assess, separately and in the aggregate, each Non-Contiguous Parcel. The consultant may issue a consolidated third-party report for the entire Property, provided each Non-Contiguous Parcel is identified and assessed separately.

Committing and Delivery

You must:

- Confirm the applicable acquisition systems Property Collateral records match and include all parcels identified in the DUS Gateway quote.
- Use separate Property Names to:
 - uniquely identify each Non-Contiguous Parcel submitted as a separate Property Collateral record; and
 - consistently reference each Non-Contiguous Parcel.
- Use the updated [Job Aid: Guidance for Entering Multiple Property Addresses in Acquisition Systems](#) when entering each Non-Contiguous Parcel as a separate Property Collateral record in C&D.
- For each Non-Contiguous Parcel entered as a separate Property Collateral record in the applicable acquisition system, submit a
 - Form 4662, and
 - rent roll.
- At Delivery, enter separate income, expenses, and Underwriting Value in the "Underwriting Data" section, using:
 - the separate operating statements and rent rolls for each Non-Contiguous Parcel entered as a Collateral Record; and
 - for the Underwriting Value, an allocated approach if the Appraisal does not breakout separate values for each Non-Contiguous Parcel, as follows:

Collateral Record Underwriting Data	Equals
GPR Per Collateral Record	Total monthly rents, including market rents for vacant units, from each Non-Contiguous Parcel's rent roll.
% GPR Per Collateral Record	GPR Per Collateral Record divided by the aggregate GPR (excluding commercial income) of all Properties securing the Mortgage Loan.
Allocated UW Value Per Collateral Record	% GPR Per Collateral Record multiplied by the Underwritten Value.

Asset Management

For each Property Collateral record in the MAMP you must obtain separate

- operating statements,
- inspection reports, and
- rent rolls.

When completing Form 4254, you must:

- receive separate operating statements for each Non-Contiguous Parcel, with the income and expenses reflecting actual results of operations for each Non-Contiguous Parcel;
- require inspection reports for each Non-Contiguous Parcel shown as a separate Property Collateral record; and
- allocate the debt service throughout the life of the Mortgage Loan based on the same % GPR Per Collateral Record as calculated during underwriting.

Operating Statement Item	Form 4254 Expectations
Expenses	<ul style="list-style-type: none">• Expenses must reflect actual expenses for each Non-Contiguous Parcel of the Property.• If there are shared expenses, then allocate according to % GPR Per Collateral Record (as calculated during underwriting) multiplied by the shared expense.
Debt Service	Debt Service must be allocated per each Non-Contiguous Parcel of the Property using the same % GPR Per Collateral Record (as calculated during underwriting) multiplied by the total debt service amount.
